3 AVTGigETL - Overview

The AVTGigETL is a module according to the GenTL specification and complies to GenICam applications providing a GenTL consumer interface. It consists of several parts: the functional interface and the feature maps for the transport layer and for the camera.

The **functional interface** is needed for dynamically controlling GigE cameras and it covers the complete functionality described in GenTL specification 1.3. There is additional functionality, which is described in chapter 8, **AVT extensions to the functional GenTL interface**.

The **features** exposed by XML files are GenAPI-conforming features described in the chapters:

- Features of the GenTL **System module** in chapter 4. The System is a module for handling multiple GenTL Interfaces in one transport layer.
- Features of the GenTL **Interface module** in chapter 5. The Interface is a module for handling multiple GenTL Devices.
- Features of the GenTL **Device module** in chapter 6. The Device module is a host-side representation of the Camera aka "Remote Device".
- Features of the GenTL **Data Stream module** in chapter 7. The Data Stream module allows handling all streaming-related operations.

The XML file of the cameras is located in the device itself and conforms to the GenICam Standard Features Naming Convention, e.g. GenICam SFNC 1.2.1.

8 AVT extensions to the functional GenTL interface

AVT transport layers provide additional functionality to the general GenTL interface. The provided extensions to Transport Layer Events allow monitoring system changes. Other extensions allow comfortable access to additional URL information.

8.1 Custom Transport Layer events

Custom additions to the following Enumerations are available:

- EVENT_TYPE_LIST (used in GCRegisterEvent and GCUnregisterEvent)
- EVENT_DATA_INFO_CMD_LIST (used in EventGetDataInfo)

Additionally, an enumeration for determining the type of a change is provided: IFCHANGE_WHAT_LIST These extensions allow the users of AVT transport layers to get informed about changes to either the interface list or the camera list.

8.1.1 Additions to EVENT_TYPE_LIST
